

Berkeley Lab Accident Statistics Through January 31, 2009

These slides are updated on a monthly basis, as soon as data are reasonably final for the preceding month. Hours worked are estimated monthly and updated with final and actual values quarterly.

While every effort is made to present accurate and final data, data may change in subsequent months, as additional information becomes available and as later developments change the recordability of some cases.

Refer questions about these charts to rwfisher@lbl.gov

Narrative of January 2009 Recordable Injury Case

- Slip/Trip/Fall injury in December became recordable in January
 - An employee slipped on the pavement/white parking striping paint and suffered an abrasion and soft tissue injury to the knee requiring medical treatment
- Ergonomic (keyboard/mouse) - repetitive strain to wrists and forearms
 - Due to additional work load and deadline an employee sustained injury bilaterally to hands, wrists, and forearms
- Material Handling – neck strain
 - While throwing two bags into a dumpster, employee sustained a strain in soft tissue of the neck and received medical treatment
- Ergonomic (keyboard/mouse) – strain of forearm
 - Since November occasional pain has become continuous leading to medical treatment
